Form & Postal Utilities Receive keeps track of incoming, outgoing and delivered items such as mail, packages, employees, products and more.

Capture and track information on an endless list of items. Easily search or filter item history and view reports.

Just like inbound, capture, track and report on outbound and delivered items.

Email and/or text notifications for any situation. Be it a receipt or delivery.

The software is capable of capturing signatures and scanning barcodes via economical wireless tablets and barcode scanners.

Receiving is ideal for offices with up to 10 active users accommodating thousands of transactions a day.

Based on Microsoft Access it doesn't require a dedicated server and the data is always available for external business access.

Local and network versions are included. Up to 3 workstation licenses contained within the basic install.

The highly customizable interface allows for business specific form layout and reporting. The program is tailored to your needs.

FPU Receiving provides proof of delivery for that last mile, letting you track an item from when it enters your building to the final destination. From door to delivery.
