Form & Postal Utilities MailOne Parcel Tracking automatically collects parcel shipping details and status into a single database. Provides a simple datasheet form with a continuous list of shipping details which includes a link to track the item from the USPS website. Every time data is gathered from MailOne new parcels are added, and existing ones have their status updated.

Gathering data from MailOne is as simple as clicking a button in the program, from the desktop icon, or as a scheduled task that will daily capture the data.
